

Saturn LED Task Light Series

The Saturn LED Task Light series is the future generation of energy efficient lighting. Exceptionally designed for years of continuous and reliable use.

Precision machined components house the latest high brightness LED technology and ultra-smooth dimming control. Engineered to produce pure white light without UV waves and thermally designed to remain cool to the touch even after hours of continuous use.

A full range of motion and precise positioning is achieved when mounted on either the fully adjustable gooseneck arm or Dazor's patented counter-balanced articulating arm.

Diverse and varied base options allow the Saturn light to be affixed to any bench, machine, table or stand.

Specifications

Lumens	600
Power Consumption	5.5 Watts
Number of LED's	1
Color Temperature	4000K CCT
Input Voltage	100V-240VAC
Output Voltage	12VDC
	50/60Hz
CRI	92+
Lifetime	70,000+ hours

KEY FEATURES

- Highest lumen efficiency available
- Precision smooth on/off dimming control
- No heat or UV emitted from light source
- 70,000 hrs of maintenance-free operation
- 22° beam spread (standard) with 16° beam angle lens option available
- Single LED produces twice the light output as a comparable 20W halogen bulb
- Multiple mounting options including many "no drill" bench bases
- 5-Year Limited Warranty
